A. DETONATOR™ THREE-SPOKE CUSTOM WHEEL

Own the open road. The rounded "liquid metal" look of these exclusive three-spoke Detonator wheels are sure to stop onlookers in their tracks. Forged from 6061 aircraft aluminum, the wheel design is created on an 8,000 ton press at Alcoa Aluminum to create a highly non-porous surface with great resistance to the elements. The resulting surface is tight, smooth, and takes a chrome finish like a mirror. Even the ridged details are forged in for a complete custom look. All H-D® wheels bear DOT and JWL markings, ensuring that they passed the tests and meet the requirements of those agencies.

Kit includes all mounting hardware.

Fits '04 XL models. Will not fit with Engine Guard P/N 49060-04.

E. SOFTAIL* COLOR-MATCHED FRONT SPOILER

This color-matched front spoiler is made from injection-molded, high impact composite materials and styled with a racy, custom appearance. Finished with the same high quality paint as all stock Harley-Davidson® products to match your original factory-applied color. Also available primed, ready for your custom paint design or in chrome. Includes the necessary hardware for quick and easy installation.

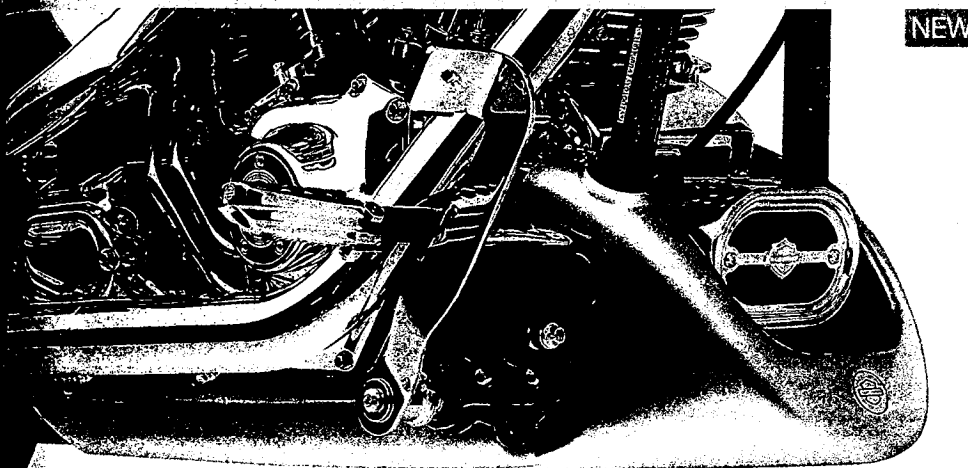

Fits '01-later Softail models with oval voltage regulator. Will not fit with Chrome Voltage Regulator Cover. Will fit with all Engine Guards.

F. BULLET COLOR-MATCHED FRONT SPOILER*

A. HARLEY-DAVIDSON®**FACTORY SECURITY SYSTEM**

Equip your Harley-Davidson VRSC, Sportster®, Dyna, Softail® or Touring model with the only security system designed and approved by The Harley-Davidson Motor Company.

When armed, the Security System disables the starter and ignition while monitoring the electrical system and vehicle motion with adjustable sensitivity. Minor disturbances trigger a momentary warning; major ones an unbroken thirty-second alarm after which the Security System returns to monitoring. A distinctive four-way flasher pattern is the alarm signal. An optional self-powered Smart Siren Kit adds a piercing scream, which sounds even if the battery cable is cut.

The Security System is armed and disarmed with a remote control waterproof key fob utilizing state-of-the-art rolling code technology. If the key fob is not available, the rider may arm or disarm the system by keying a previously entered personal code on the turn signal switches. A flashing status indicator informs the rider that the Security System is armed or disarmed.

When armed in the Transport Mode, the Security System disables the starter and ignition, but monitors only the electrical system, not vehicle motion. The vehicle may be moved, but electrical tampering triggers an alarm.

An Extended Storage Mode keeps the battery from discharging when the Security System is armed for extended periods of time.

The Security System is compatible with FL Touring models equipped with approved TLE/Ultra Sidecars when the system is configured as described in the SIDE-CAR OWNER'S MANUAL.

Bodyguard in a Bottle

Introducing a breakthrough in powertrain protection – Screamin' Eagle® SYN3 Synthetic Motorcycle Lubricant. For use in engines, transmissions and primary chaincases, it's just the latest in a line of products formulated specifically to keep your Harley® running strong, mile after mile.

SCREAMIN' EAGLE® SYN3 SYNTHETIC MOTORCYCLE LUBRICANT, SAE 20W50

TESTED-CERTIFIED for use in Harley-Davidson Engine, Primary Chaincase and Transmission applications, the new Screamin' Eagle SYN3 Synthetic Lubricant makes changing and topping-off fluids a simple one-product process. Developed with a proprietary three synthetic basestock formula, Screamin' Eagle SYN3 Lubricant is formulated to provide for long-term protection and engine cleanliness requirements, and to provide superior high-temperature protection for high-output engines. SYN3 is formulated to maintain the coefficient of friction for proper clutch operation and to provide the proper lubrication to the primary chain drive. In addition, SYN3 is designed to provide the correct lubricity for the anti-wear requirements of transmission gears and for improved seal protection. This formula is approved by Harley-Davidson for use in all stages of engine life and is not detrimental to the break-in stage of engines.

Formulated for Harley-Davidson Evolution® XL, Evolution 1340, Twin Cam, V-Rod Revolution, and all Buell® models.

99824-03/00QT 1 Quart Bottle.

\$8.25

What are the key benefits to using SYN3?

- SYN3 Lubricant can be used in the engine, primary chaincase, and transmission.
- SYN3 Lubricant offers improved film strength for superior wear protection at high temperatures, and improved deposit control for a cleaner engine, transmission, and primary chaincase.
- SYN3 Lubricant is formulated for reduced oil consumption, improved wear protection, high-temperature detergency, and superior overall field performance.

Get Three Kinds of Protection with High-Performance Screamin' Eagle® SYN3 Synthetic Motorcycle Lubricant

A miracle of modern motorcycle science.

The product of a sophisticated research and development program, SYN3 is the first synthetic motorcycle lubricant designed, tested and certified by Harley-Davidson Engineering exclusively for use in Harley-Davidson® engines, transmissions and primary chaincases. It's a high-performance proprietary formulation containing special additives and inhibitors that offers the most advanced and complete engine protection available for Harley-Davidson motorcycles – including those with high-performance engines.

What's the difference between synthetic and petroleum-based lubricants?

Both synthetic and petroleum-based lubricants are derived from the same crude oils. But that's pretty much where the similarities end. Unlike their petroleum-based counterparts, which inherit physical components (including contaminants) of the source crude oil in the refining process, synthetic lubricants are manufactured from base stocks that are custom-designed from scratch to have desired properties for specific purposes, meaning that engineers have complete control of the lubricant from start to finish – at the molecular level.

What does SYN3 do for my drivetrain?

SYN3 offers all the benefits of Genuine Harley-Davidson® 360 Motorcycle Oil, and:

- Offers superior wear protection at higher temperatures
- Keeps engines, transmission and primary chaincases cleaner
- Meets the anti-wear lubricity requirements of all transmission gears
- Lubricates all primary chaincase components
- Delivers smooth, sure clutch operation
- Provides long-term protection of all internal components
- Improves seal and gasket performance
- Offers superior performance in high-output engines

What testing was performed on SYN3 Synthetic Motorcycle Lubricant?

During its development, SYN3 was subjected to more than three years of laboratory bench testing, dynamometer testing under accelerated conditions, open road vehicle durability testing, closed course durability testing, and wear and deposit rating analysis.

In which motorcycle models can I use SYN3?

SYN3 is formulated for use in Harley-Davidson Evolution® XL, Evolution 1340, Twin Cam® (all displacements) and Revolution-equipped models, as well as all Buell® models. SYN3 should not be used in pre-Evolution® engines, four-speed Big Twin transmissions, or early Shovelhead® 5-speed transmissions, since it was not tested or developed for those applications.

When can I start using SYN3?

Right away. SYN3 Synthetic Motorcycle Lubricant is approved for all stages of engine life, including the first service interval – which means it's not detrimental to engine break-in. You can even use it as a first fill upon delivery of a new motorcycle.

Since SYN3 is a high-performance lubricant, can I wait longer between changes?

No. As with petroleum-based engine lubricants, you should drain and replace the synthetic motorcycle lubricant in your engine, transmission and chaincase at every 5,000-mile service interval. You should also change your oil filter anytime the engine lubricant is changed. If you ride your motorcycle hard, under dusty conditions, or in cold weather, you should change your SYN3 and oil filter more often. You should always change your engine lubricant and filter prior to any extended storage so that your engine is clean and free of any contaminants during this time.

GENUINE HARLEY-DAVIDSON® MOTORCYCLE OIL
Harley-Davidson Genuine H-D® 360 Motorcycle Oil is developed and tested for use in Harley-Davidson motorcycles. Our unique additive package helps prevent engine wear and helps keep your engine cooler, cleaner, free of sludge, varnish and corrosion.

Harley-Davidson V-Twin motorcycles operate at higher temperatures than water-cooled automobiles, thus a specific high temperature additive package is necessary to protect the engine. Be assured, H-D 360 Oil can be trusted in a Harley-Davidson engine.

Available in SAE 10W40, SAE 20W50, SAE 50, and SAE 60. Refer to your Harley-Davidson owner's manual for the proper SAE grade recommendation based on the climate and temperature range you ride in.

Protect your Harley-Davidson® with H-D® 360 Motorcycle Oil.

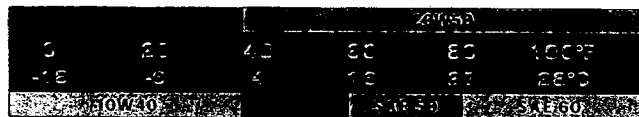

What Goes Into Harley-Davidson® Motorcycle Oil?

Harley-Davidson Motorcycle Oil is unlike off-the-shelf oils. H-D® 360 is a complex mixture of carefully selected premium quality mineral oil and an exclusive performance additive package. Designed for maximum performance in H-D engines, H-D 360 is a unique oil for a unique application.

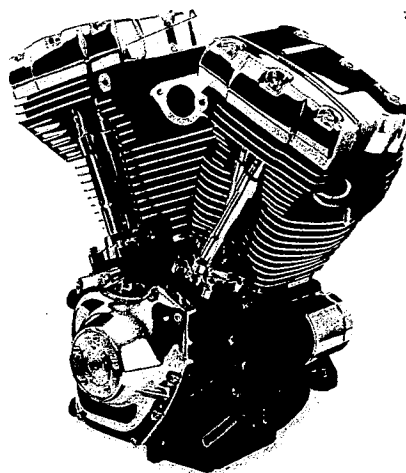

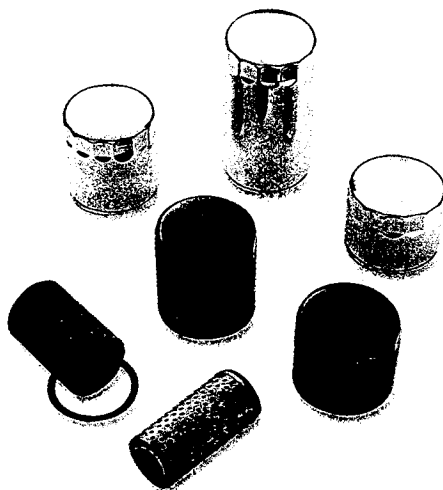

H-D® 360 – More Than a Logo – A Performance Rating System

The name Harley-Davidson 360 has its roots in the testing criteria applied to certify this new oil. More than just a dynamometer test, it is a designation of an entirely new performance rating system. To earn the name H-D 360, this oil had to outperform all others on a full round of tests. Laboratory bench testing measured viscosity retention and oxidation stability. Next, the oil was run on the open road under high ambient temperatures and high load conditions. After each test, the engineers performed a complete engine tear-down and analysis. Plenty of oils vied to carry the name Harley-Davidson, but only one oil met the challenge: H-D 360.

What viscosity grade should I use in my Harley?

The recommended viscosity grade for all temperature conditions is SAE 20W50 Harley-Davidson Motor Oil. SAE 10W40 H-D Motorcycle Oil is also available and appropriate for low temperature climates. The SAE 50 H-D Motorcycle Oil is satisfactory in ambient temperatures of 60-80°F, and the SAE 60 H-D Motorcycle Oil in ambient temperatures above 80°F. SAE 20W50 covers the broadest range of operating temperatures.

What does Harley-Davidson Motorcycle Oil do for my engine?

- Protects the engine from rust and corrosion.
- Keeps the engine clean.
- Cools engine parts.
- "Seals in" combustion pressure.
- Prevents foaming.
- Permits easy starting at a wide range of temperatures.
- Provides quick oil circulation.
- Reduces friction and power loss.

How often should I change my motorcycle engine oil?

You should change your motorcycle engine oil and engine oil filter at the first 1,000-mile service interval and at every 5,000-mile service interval thereafter. If you ride your motorcycle hard, under dusty conditions, or in cold weather, the engine oil and filter should be changed more often. You should always change your engine oil and filter prior to winter storage (or any extended storage) so that your engine oil is clean and free of contaminants for this time period.

Can I go longer between oil changes by changing the filter?

NO! The job of the oil filter is to remove dust, soot and other solid matter. But it cannot remove water, gasoline or acids. And, it can't do the job of additives that have been used up. Follow the recommended oil and oil filter changes in your Harley® owner's manual.

GENUINE HARLEY-DAVIDSON® FLUIDS**Some Facts You Should Know About Genuine Semi-Synthetic Transmission Fluids and Sport-Transmission Fluid:**

Unique products developed specifically for Harley-Davidson® transmissions to provide superior lubrication. Consider these unique performance features:

- Maintains viscosity (doesn't thin out).
- Conventional gear lubes or motor oils can actually be sheared by the high-speed action of the drive gears. The result is a loss of viscosity or thinning out in service and high wear to the gear teeth.
- These products are designed to withstand this shearing action and maintain viscosity between services.
- Superior lubrication over wide temperature ranges. These fluids are not affected by changes in temperature as much as conventional lubes or oils.
- Fights corrosion and wear. H-D's Semi-Synthetic Transmission Lube and Sport-Trans Fluid contain special additives to protect against rust and corrosion. They also contain potent high film-strength anti-wear additives to handle heavy loads placed upon the drive gears.

Special high alumina insulator provides self adjusting temperature for maximum resistance to fouling. Harley-Davidson's longest lasting spark plugs. Sold in pairs.

Harley-Davidson Parts and Accessories Division, a facility of Harley-Davidson Motor Company, recently achieved certification to its ISO 9001 International Quality Standard registration.

CAUTION: It is possible to overload your motorcycle's charging system by adding too many electrical accessories. If your combined electrical accessories consume more electrical current than your vehicle's charging system can produce, the electrical consumption can discharge the battery and cause vehicle electrical system damage. Ask your dealer for advice about the amount of current consumed by additional electrical accessories.

IMPORTANT: To the best knowledge of Harley-Davidson, the specifications, descriptions and illustrative material contained herein are accurate as of the date this catalog was approved for printing (July, 2003). Harley-Davidson reserves the right without prior notice to discontinue at any time at its discretion any of the parts and accessory items depicted herein or change specifications or designs or prices without incurring any obligation to the customer. All parts and accessory items are also subject to availability and to prior sale by our dealers.

Hastings, Loctite, Permatex, S100, Blue Coral Blue Buster, Novus, Lexan, Dunlop, and Lubit-8 are the trademarks of their respective owners.

IN LIFE THERE ARE NO GUARANTEES. WITH GENUINE MOTOR ACCESSORIES, IT'S A DIFFERENT STORY.

Order Genuine Motor Accessories for dealer installation before delivery of your new Harley-Davidson motorcycle, and you can now get a 24-month warranty on your custom options.* That's 21 months longer than the standard 90-day warranty, and a full year longer than previously available coverage. And if you're financing your bike, the cost of accessories can be rolled right into your monthly payment, making it even easier to customize. With dealer installation, you'll also be able to keep an accurate, consolidated record of your new accessories for insurance purposes, should your motorcycle ever be stolen or damaged. So your peace of mind is guaranteed.

*Participating U.S. Harley-Davidson dealers may offer a 24-month limited warranty on street-legal Genuine Motor Accessories (including street-legal Screamin' Eagle Performance Parts) installed by the dealer on a new Harley-Davidson motorcycle prior to delivery, subject to certain terms and conditions. Ask your dealer for details.
